NOTE 2 - Summary of most significant accounting policies

The accounts of the Fund are expressed in EUR and the accounts of the Sub-Funds are kept in the currency of each Sub-Fund. The combined statement of net assets and the combined statement of operations and other changes in net assets are the sum of the statement of net assets, the statement of operations and other changes in net assets of each Sub-Fund converted with the exchange rate prevailing at period-end.

The significant accounting policies are summarized as follows:

a) Valuation principles

The value of the Assets of the Fund is determined as follows:

1. the value of any cash on hand or on deposit, bills and demand notes payable and accounts receivable, prepaid expenses, cash dividends and interest declared or accrued as aforesaid and not yet received shall be deemed to be the full amount thereof, unless in any case the same is unlikely to be paid or received in full, in which case the value thereof shall be arrived at after making such discount as the Board of Directors of the Fund may consider appropriate in such case to reflect the true value thereof;

2. the value of any asset admitted to official listing on to any stock exchange or dealt on any regulated market shall be based on the last available closing or settlement price in the relevant market prior to the time of valuation, or on any other price deemed appropriate by the Board of Directors of the Fund;

3. the value of assets that are not listed or dealt in on a stock exchange or on any regulated market or if, with respect to assets listed or dealt in on any stock exchange or any regulated market, the price as determined pursuant to sub-paragraph (1) is in the opinion of the Directors not representative of the value of the relevant assets, such assets are stated at fair market value or otherwise at the fair value at which it is expected they may be resold, as determined in good faith by or under the direction of the Board of Directors of the Fund;

4. the liquidating value of futures, forward or options contracts not traded on a stock exchange of an Other State or on Regulated Markets, or on Other Regulated Markets or dealt on any Regulated Market shall mean their net liquidating value determined, pursuant to the policies established prudently and in good faith by the Board of Directors of the Fund, on a basis consistently applied for each different variety of contracts. The liquidating value of futures, forward or options contracts traded on a stock exchange of an Other State or on Regulated Markets, or on other Regulated Markets or dealt on any Regulated Market shall be based upon the last available settlement or closing prices as applicable to these contracts on a stock exchange or on regulated markets, or on other regulated markets on which the particular futures, forward or options contracts are traded on behalf of the Fund; provided that if a future, forward or options contract could not be liquidated on the day with respect to which assets are being determined, the basis for determining the liquidating value of such contract shall be such value as the Board of Directors of the Fund may deem fair and reasonable;

* Sub Fund liquidated as on 14 July 2017

** Sub-Fund launched as at 24 March 2017

LFPARTNERS INVESTMENT FUNDS

NOTES TO THE FINANCIAL STATEMENTS (continued)

AS AT 30 JUNE 2017

NOTE 2 - Summary of most significant accounting policies (continued)

5. Money Market Instruments with a remaining maturity of 90 days or less will be valued by the amortized cost method, which approximates market value. Under this valuation method, the relevant Sub-Fund's investments are valued at their acquisition cost as adjusted for amortisation of premium or accretion of discount rather than at market value;

6. units or shares of an open-ended undertaking for collective investment ("UCI") will be valued at their last determined and available official net asset value, as reported or provided by such UCI or its agents, or at their last unofficial net asset values (i.e. estimates of net asset values) if more recent than their last official net asset values, provided that due diligence has been carried out by the investment manager, in accordance with instructions and under the overall control and responsibility of the Board of Directors of the Fund, as to the reliability of such unofficial net asset values. The net asset value calculated on the basis of unofficial net asset values of the target UCI may differ from the net asset value which would have been calculated, on the relevant Valuation Day, on the basis of the official net asset values determined by the Administrators of the target UCI. The net asset value is final and binding notwithstanding any different later determination.

7. interest rate swaps will be valued on the basis of their market value established by reference to the applicable interest rate curve. Total return swaps will be valued at fair value under procedures approved by the Board of Directors of the Fund. As these swaps are not exchange-traded, but are private contracts into which the Fund and a swap counterparty enter as principals, the data inputs for valuation models are usually established by reference to active markets. However it is possible that such market data will not be available for total return swaps near the Valuation Day. Where such markets inputs are not available, quoted market data for similar instruments (e.g. a different underlying instrument for the same or a similar reference entity) will be used provided that appropriate adjustments are made to reflect any differences between the total return swaps being valued and the similar financial instrument for which a price is available. Market input data and prices may be sourced from exchanges, a broker, an external pricing agency or a counterparty.

If no such market input data are available, total return swaps will be valued at their fair value pursuant to a valuation method adopted by the Board of Directors of the Fund which shall be a valuation method widely accepted as good market practice (i.e. used by active participants on setting prices in the market place or which has demonstrated to provide reliable estimate of market prices) provided that adjustments that the Board of Directors of the Fund may deem fair and reasonable be made. The Fund's auditor will review the appropriateness of the valuation methodology used in valuing total return swaps. In any way the Fund will always value total return swaps on an arm-length basis. All other swaps will be valued at fair value as determined in good faith pursuant to procedures established by the Board of Directors of the Fund;

8. assets or liabilities denominated in a currency other than that in which the relevant Net Asset Value will be expressed, will be converted at the relevant foreign currency spot rate on the relevant Valuation Day. If such quotations are not available, the rate of exchange will be determined in good faith by or under procedures established by the Board of Directors of the Fund. In that context account shall be taken of hedging instruments used to cover foreign exchange risks;

9. all other securities, instruments and other assets will be valued at fair market value, as determined in good faith pursuant to procedures established by the Board of Directors of the Fund.

b) Net realized gain / (loss) on sales of securities

The realized gains or losses on the sales of securities are calculated on the basis of the average cost of the securities sold and recorded in the statement of operations and other changes in net assets.

c) Valuation of financial futures contracts

The realized gains or losses on the sales of futures contracts are calculated on the basis of the average cost of the futures contracts sold. Realized and change in unrealized profits and losses are recorded in the statement of operations and other changes in net assets.

d) Valuation of forward foreign exchange contracts

The unrealized gain / (loss) of outstanding forward foreign exchange contracts is valued on the basis of the forward exchange rates prevailing at valuation date.

LFPARTNERS INVESTMENT FUNDS

NOTES TO THE FINANCIAL STATEMENTS (continued)

AS AT 30 JUNE 2017

NOTE 2 - Summary of most significant accounting policies (continued)

e) Valuation of Swaps

Swaps are valued at valuation date at market prices prevailing at this date and resulting unrealised gains or losses are recorded in the Statement of Operations and Other Changes in Net assets and are shown under other assets / liabilities in the Statement of Net Assets.

f) Conversion of foreign currencies

Bank accounts, other net assets and the valuation of the investments in securities held denominated in currencies other than the reference currency of the different sub-funds are converted at the closing spot rates on the valuation date. Income and expenses denominated in currencies other than the currency of the sub-fund are converted at the mid closing spot rates at payment date. Gain or loss on foreign exchange is included in the statement of operations and other changes in net assets. The cost of securities denominated in currencies other than the reference currency of the different sub-funds is converted at the mid closing spot rate prevailing on the day of acquisition.

g) Accounting of securities' portfolio transactions

The securities' portfolio transactions are accounted for the bank business day following the transaction dates.

h) Formation expenses

The expenditure involved in the initial launching and marketing of the Fund, as well as the cost of launching new sub-funds and other extraordinary expenses may be written off over a period of up to five years. The costs of launching new sub-funds will be written off only by the respective sub-fund. The expenditure involved in establishing the Fund still outstanding may only be written off by the sub-funds launched at the same time as the Fund was established.

i) Securities Repurchase Agreements

The Fund may, for any sub-fund, engage in repurchase agreements on an ancillary basis. Repurchase agreements involve the purchase and sale of securities where the seller has the right or obligation to repurchase the securities sold from the buyer at a fixed price and within a certain period stipulated by both parties upon conclusion of the agreement.

j) Techniques and Instruments for Hedging Currency Risks

In order to protect its assets against the fluctuation of currencies, the sub-fund may enter into transactions the purpose of which is the sale of currency futures contracts, sale of call options or the purchase of put options in respect of currencies. The transactions referred to herein may only concern contracts which are traded on a regulated market, operating regularly, recognised and open to the public. For the same purpose each sub-fund may also sell currencies forward or exchange currencies on a mutual agreement basis with first class financial institutions specialising in this type of transactions. The hedging objective of the transactions referred to above presupposes the existence of a direct relationship between these transactions and the assets which are being hedged and implies that, in principle, transactions in a given currency cannot exceed the total valuation of assets denominated in that currency nor may the duration of these transactions exceed the period for which the respective assets are held.

k) Investment income

Dividend income is recorded at the ex-date, net of any withholding tax.

DISTRIBUTION FEE

The Distributor will receive a Distributor Fee paid by the Fund which is the Share Creation Charge.

The Distributor Fee is normally payable by the Fund on a monthly basis within fifteen (15) Business Days following the Valuation Day.

There is no additional charge for distribution to be paid by the Fund to the Distributor.

A Share Creation Charge ("SCC") of 5% will apply: represented by a monthly charge, equal to 0.083% per month of every subscription amount received, which will be borne by the Fund in the form of a Share Creation Charge and amortised back to the Fund on a daily basis over a period of sixty (60) months from the date of each subscription. The Share Creation Charge shall apply to all initial subscriptions and any subsequent subscriptions. The full amount of the Share Creation Charge may be paid to officially appointed parties involved in the offering of Shares, at the time of the subscription. Upon redemption of shares the Share Creation Charge will extinct, the write off of the remaining accrual will be materialized by a Contingent Deferred Sales Charge computed on a pro rata temporis.

The amount still to be amortised has been included in the Statement of Net Assets under "other assets".

PERFORMANCE FEE

The Fund will pay to the Management Company a Performance Fee, which will be accrued daily and paid quarterly in the respective currency of each class of shares. The Fund shall take a Performance Fee of 20% of the quarterly return of the class of shares in their respective currencies subject to a quarterly hurdle rate and calculated in the following prescribed manner:

1. If, at the end of the reference period, the quarterly return of the class of shares is less than or equal to the quarterly hurdle rate, then the class of shares shall not be entitled to any performance fee;
2. If, at the end of the reference period, the quarterly return of the class of shares is greater than the corresponding quarterly hurdle rate then the Management Company shall be entitled to a performance fee of 20% of the quarterly performance above the High Water Mark.
3. If, at the end of the reference period, the class of shares is below its High Water Mark then the class of shares shall not charge a performance fee until such time as the class of shares has reached its High Water Mark.
4. In no event shall the Management Company have to return any Performance Fees previously charged and paid with respect to the class of shares.

The quarterly hurdle rate will be 1.25%.

The "High Water Mark" is defined as the higher of (i) the Initial Issue Price of such Share or issue price and (ii) the highest Net Asset Value per Share of the relevant Class at the end of the previous quarter in respect of which a Performance Fee was computed and charged.

The reference period starts on the first day of each calendar quarter and ends on the last day of the same calendar quarter. Exceptionally, the first reference period on each Class starts on the launch date of that Class and ends on the last day of the same quarter.

The relevant percentages of the Performance fee are disclosed below in respect of each class of shares.

The portion of net assets, which is invested in other undertakings for collective investment in securities under Luxembourg law, is exempt from this tax.

This annual tax is however reduced to 0.01% on the aggregate net asset value of the shares in the classes reserved to institutional investors, as well as in Sub-Funds that invest exclusively in certain short term transferable debt securities and other instruments pursuant to the Grand Ducal Regulation of 14 April 2004.

To limit the risk of loss to the Fund, the borrower must post in favour of the Fund collateral representing at any time, during the lifetime of the agreement, at least 90% of the total value of the securities loaned in favour of the Fund. The amount of collateral is valued daily to ensure that this level is maintained.
