

SPAC SOLUTIONS

Comprehensive, on-the-ground support for your transactions

The exceptional environment for capital raising has led to a dramatic surge in the use of special purpose acquisition companies (SPACs). Alter Domus has the expertise and global reach to support the listing and management of your SPAC.

SPACs continue to grow in popularity as an alternative to traditional IPOs in capital markets. There are currently more than 500 SPACs listed on Nasdaq and 15 listed on Euronext.

At Alter Domus, our solid footprint in key SPAC listing jurisdictions such as the Netherlands, United States and United Kingdom, along with our deep experience in the capital market industry, ensure our ability to assist you with the listing and overall management of your SPAC.

Our teams are well placed to provide corporate secretarial, administration and escrow services throughout the two-year period of the SPAC being listed on an exchange with the purpose of raising capital to acquire a target company that aligns with the preset investment criteria. If the SPAC does not make an acquisition, Alter Domus can also assist with the liquidation and cancellation of the listing.

Rely on our extensive experience as an escrow agent for capital markets transactions to ensure your SPAC is managed and listed by a team of knowledgeable industry experts.
